About this Report

This Valuation Report provides information from current businesses for sale and "sold" businesses in the BizBuySell database.

Each Valuation Report contains dollar averages as well as average and median multipliers. For comparable asking and sold prices, we suggest you use the median multiplier numbers because averages may include numbers that are significantly outside the normal range.

The numbers contained in this Valuation Report have not been verified by BizBuySell.com. They serve as an excellent "ballpark" starting point and can provide an approximation of what a particular business might sell for. However, they cannot substitute a professional valuation. Use the numbers at your own risk.

Valuation Report data is for your business use only and cannot be reproduced, copied or used for any commercial purpose other than your internal office use or one-on-one presentations to a client of, or advisor to, your business and cannot be distributed, made available or promoted in any form whatsoever to groups of individuals without the prior written permission of BizBuySell.com Inc.
